

CUSTOMER SET-UP TENTS

20'X20' CUSTOMER INSTALL INSTRUCTIONS

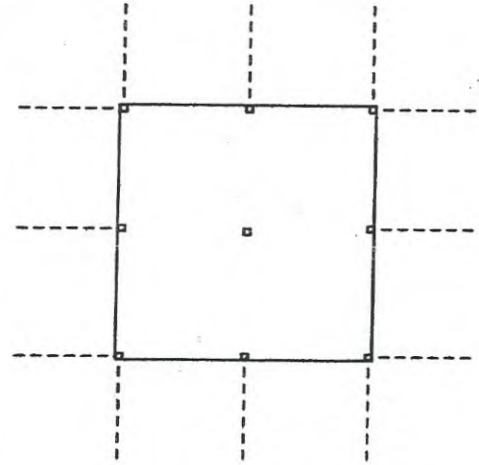

Roll out and unfold tent top over area for tent to be installed.

Place two stakes at each corner grommet and one at each mid grommet.

Assemble your side poles and center poles.

A. Side poles = 1 point + 1 bottom

B. Center poles = 1 point + 2 middle + 1 short bottom

Place each side pole around the perimeter at each grommet.

Starting at one corner, have one person place the point thru the grommet and stand the pole upright. While the other person takes the rope and stake and following the line of the tent pull the rope lightly snug and stake in both directions.

Continue to the mid and then around the perimeter in a clockwise fashion.

Once all the stakes are in place take the center pole and place it in the center grommet and push the pole upright.

Once center pole is straight in the center go back around the perimeter straighten the side poles and tighten any stakes that need readjusted.
